

And the generous support of

EFIS on Tour Symposium

Friday, 15 March 2024

13:00 – 18:30

Polo Didattico “Giorgio Zanotto” – Aula T1
Università degli Studi di Verona
Viale Università 4, Verona

Co-Chairs:

Marco Cassatella – Federica Sallusto

- 13:00 – 13:15 **Welcome and Introduction**
Marco Cassatella – President, Italian Society of Immunology, Clinical Immunology and Allergology (SIICA)
- About EFIS**
Federica Sallusto – President, European Federation of Immunological Societies (EFIS)
- 13:15 – 13:45 On the modulation of allergen-specific T cell responses
Winfried F. Pickl, Medical University of Vienna
- 13:45 – 14:15 Immunoregulatory functions of myeloid MS4A proteins
Massimo Locati, Humanitas Research Hospital and University of Milan
- 14:15 – 14:45 Exhaustion of virus-specific regulatory T cells in severe COVID-19
Vincenzo Barnaba, Sapienza University of Rome
- 14:45 – 15:15 Diet and gut inflammation
Federica Laudisi, Tor Vergata University of Rome
- 15:15 – 15:45 A journey towards an unprecedented number of colours
Gianluca Rotta, BD BioSciences, Milan
- 15:45 – 16:15 **Coffee break**
- 16:15 – 16:45 Advancing knowledge on human polymorphonuclear myeloid-derived suppressor cells (PMN-MDSCs)
Marco Cassatella, University of Verona
- 16:45 – 17:15 An IFN γ -dependent immune-endocrine circuit lowers blood glucose to potentiate the innate anti-viral immune response
Bojan Polić, University of Rijeka
- 17:15 – 17:45 Human IL-12rb1 deficiency reveals novel essential roles of IL-12 and IL-23 in innate and adaptive immune responses
Francesco Annunziato, University of Florence
- 17:45 – 18:15 Dissecting the repertoire of human regulatory T cells
Federica Sallusto, ETH Zürich and IRB Bellinzona
- 18:15 – 18:30 **Wrap up**
